

AICE Biology

Molecular Biology Research

Search online for information about medical advances through molecular research in the last 5 - 10 years. You will be asked to share your information with the class at a later date. Your research will be assessed on depth of content and clarity of information. Photos, diagrams and charts are recommended. Cite your sources in APA format.

- Topic clearly noted
- Company(s) doing research (include country)
- Details , interesting facts backed by research
- What types of research are being explored
- Compare /contrast modern medical technique with what was being done in the past
- What medical advances have been accomplished? Be specific
- Describe what field of science has benefitted from this research: i.e. health care, pharmacy, etc.
 - Which has shown the most promise, why? Explain.
- What is on the drawing board for future research?
