

(G) Mammalian Transport

Research factors that affect the heart

Research using classroom computers and biology textbooks.

Divide into 6 groups and choose one cause to research. Each group must choose a different topic.

- poor diet
- smoking
- stress
- obesity
- lack of exercise
- inherited factors

Presentation:

May be in PowerPoint, or simply a printed sheet of paper showing statistics and information below.

Clearly state your factor

Give explanation related to cause and effect of the factor in question

State preventive measures and/or cures

Cite sources

Present for 3-5 minutes to class
