

## Serenity Room

Come and relax in our exquisitely designed Serenity Room

Lite Touch Medical Spa professionals understand that to attain the best possible outcome

individuals must first make a decision to be well and commit to implementing proper choices toward their goals. We help our clients address challenges that may be preventing them from living the life they deserve. Our medically supervised and comprehensive programs provide our clients with the support, rejuvenation and results needed to attain a healthy and meaningful lifestyle.

Lite Touch Medical Spa offers their clients many different options for both medical & cosmetic solutions to improve and enhance both internal health and external beauty. These services include plastic surgery procedures (face lift, body lift, breast augmentation, rhinoplasty, scar revision, cheek implants, buttock implants, etc.), body sculpting, an anti-aging medicine program, skin rejuvenation with AFT pulsed light (non-invasive alternative) and more.

A Comprehensive anti-aging program brings together the best of traditional, preventive, and alternative medicine. An individualized program is designed based on the outcome of your evaluation, utilizing leading-edge, science-based health technology to bring about the solutions you are seeking: *Anti-Aging Comprehensive Assessment, Biotidentical Hormone Replacement Therapy, and Lifestyle Therapeutic Changes Program.*

Our individualized treatment plans are performed by Medical Doctors and, in some cases, certified medical assistants, specializing in the following:

Lite Touch Medical Spa offers clients comprehensive wellness, preventive, and advanced medical and cosmetic solutions in a luxurious spa setting. Lite Touch utilizes the most advanced FDA approved procedures to help patients safely attain the health, wellness, and pro-aging goals they desire. Our individualized custom treatment plans are physician directed, providing patients with quality care from board certified Physicians. Lite Touch Medical Spa is the premiere spa located in Chantilly, Virginia combining Expertise, Experience and Exceptional care for optimal wellness results.

Skin Rejuvenation with AFT Pulsed Light is the simple, quick and non-invasive alternative to major plastic surgery using pulsed light. This technology safely and painlessly tightens loose skin on the face, neck, arms and abdomen where sagging skin points out the passage of time. The pulsed light tones and textures your skin for an improved overall skin with a younger appearance.

Tumescent Liposuction is one of Dr. Pettitt's area of expertise. The tumescent technique is a relatively new liposuction method that reduces post-operative bruising, swelling and pain. Only a local anesthetic is used. There is no post-surgical nausea, nor the unpleasant feeling of "hang-over" usually associated with general anesthesia. Most patients can return to work within three to four days after surgery.
